

Event Marker Pro

"Completely automate student registration"

Event Marker Pro is a simple to use interface for collecting attendance data. It is web based but very powerful, able to record attendance in college or off campus. It can record statutory attendance, lesson attendance and ad-hoc / enrichment attendance.

i The system gathers and displays attendance in real time using a very user-friendly GUI in the classroom. The lecturer is able to see who is attending the lecture by simply swiping his or her card. As long as it is the right place and time for the event to occur, the screen will automatically show the current register and attendees.

The system links seamlessly to Capita's UNIT-e MIS delivering attendance marks into Attendance Grid.

The system uses the attendance codes and settings from MIS. We are an approved Capita Technical Partner. Event Marker Pro also links to Compass' ProSolution MIS for ad hoc register recording, both on and off campus.

NB. All times are configurable.

The **red** block represents the duration of a lesson. Students should aim to arrive in the areas indicated in green

Early (green banner)... swiping 15 minutes before lesson, up to lesson start time

Late (yellow banner) swiping 10 minutes after lesson start, up to end of lesson

Present (green banner) swiping at lesson start, up to 10 minutes after start

Absent (grey banner) no swipes recorded before or during lesson

Use one of our basic card readers or have a kiosk!

All you need to get started...

- Networked PC
- Linked Projector Screen (Optional)
- Speakers

PLUS

- Card readers or kiosks in each classroom
- Mifare cards (for staff and students)
- Event Marker Pro software

Now look at all these benefits:

For Students:

- Register quickly with just one swipe per class
- Take control of attendance personally and increase the likelihood of EMA payments
- View daily timetables and outstanding assignments at access points around the college

For Teachers:

- Increased teaching time and reduced start-of-lesson administration
- Simply swipe your ID card to open and close the register
- Add comments about students' lateness or behaviour
- Review recent attendance history for individuals and groups
- Empower students to register themselves for lessons

For The College:

- Rapid ROI (return on investment) due to the substantial saving of staff time
- High quality management information available to staff - in the classroom & staff room
- Improved flow of EMA/bursary payments to students, creating student loyalty & reducing complaints
- Simple reporting structures to quickly build up attendance statistics
- A range of add-on software modules such as enrolment ID card printing to streamline college processes

There are lots of other more subtle features that can only be shown in a demonstration.

To see the truly remarkable user-friendliness of the system, please contact us for an on-line demonstration or a site visit.
